What's New in the?

Enhanced Assignments: Assign parts to positions and automatically show work path to the assigned position. Work path traces enable you to see progress during a design or prepare presentation to supervisors, including after-hours. (video: 1:53 min.) Improved Drawing and Geometry: Ability to print your drawing in a continuous mode, so that you can reduce the number of layers and maintain stability in the layers. You can even save your drawing as a continuous print (Export as Linked/Continuous Print). Enhanced Annotations and Docs: Manage and create unlimited annotations, from paragraph, to your personal notes, to annotations used as part of your drawing comments. Annotation notes are captured in the drawing and can be viewed in Comment Window and Docs. Enhanced Schedule and Schedule Manager: Create a schedule to control how parts are designed. Use templates to automate task planning. Add colors, comments, and marks to the drawings to highlight your work. Schedule Manager includes a new Planner window for enhanced scheduling. AutoCAD Offers a More Realistic Look and Feel: You can now customize AutoCAD for your liking with the new Windows theme. Apply themes that bring the app to life. Refine drawings using advanced polyline and polygon tools (video: 3:04 min). Copy drawings, including dimensions, in place (video: 2:04 min). Support for over 100 part and assembly file formats. Assemblies and Components to Create More 3D Models: AutoCAD MEP provides the tools to import assemblies, create 3D models, and view components and assemblies in 3D. You can use assemblies for many 3D-based CAD applications, including production, visualization, and training. (video: 2:24 min) Assemblies to Create More Realistic Views: Assemblies and components can be rendered in 3D in AutoCAD MEP, with the new visualization tools and rendering features.
