The purpose of this descriptive study is to investigate the provision and quantity of disability and health care services to one group of university faculty with disabilities. The study is based on 30 semistructured interviews with faculty members with disabilities. Results indicate that on average, faculty with a disability receive fewer disability services and fewer than once a month attend appointments at health care facilities. Researchers have not addressed in any depth how university faculty with disabilities perceive the provision of disability and health care services within their workplaces. Providing faculty with a disability with disability services and offering more than once a month consultations at health care facilities are not an appropriate "fix" to the problem of underutilization of health care services by faculty with disabilities. Additional research with faculty with disabilities is needed to identify barriers to the provision of disability services and health care services, as well as alternative methods of promoting academic productivity among faculty with disabilities.L'affaire se passe dans les couloirs du 12e étage du palais de justice de Paris. Le 14 février, le préfet de Police de Paris, Michel Delpuech, part à l'improviste avec un complot de galie en tête. Il a été arrêté par la police judiciaire dans la foulée. C'est en rentrant chez lui, chez lui et la maman de ses deux enfants, que les soupçons ont été levés. Selon nos informations, après s'être donné rendez-vous à l'appartement de sa mère, le préfet de Police a évacué la maison et décidé de se rendre à l'hôpital du Val d 570a42141b
