Live Keymacro for Skype 1.0.4.0 (Offline Mode) is a very useful tool for Skype users and will help you to record any conversation in Skype, convert audio files to mp3, wav, aiff, mp4, m4a, mp3 and many other formats. KEYMACRO includes three main tools: Record(also as wma), ConvertAudio(also as wma, wav) and ConvertVideo(also as wma, avi, mkv, ogv, mov, mpeg, mpg). The ConverterAudio&ConvertVideo supports batch mode. Just hit a hotkey to auto start. (e) and (f) mean that the two proposals are similar in terms of originality. ³L³ stands for length and ⁴C⁴ stands for character. We can see that only the model with self-attention proposed by Lu et al. has significantly shorter length while the model with residual connections proposed by Ku et al. has the shorter character. We can also see that the character of the models proposed by Lu et al. and Ku et al. are less distinctive while the models with self-attention proposed by Lu et al. and Ku et al. are more distinctive. This also proves the effectiveness of the proposed self-attention mechanism in preserving the local structural information. Affixa X64

Affixa is an e-mail software, which is an easy-to-use tool that makes it possible to send e-mails directly from various programs, via your Gmail, Yahoo Mail, Zimbra or Office 365 accounts. After launching Affixa, you can add various webmail accounts and have the application connect to them automatically. It supports addresses created in Gmail, Yahoo Mail, Zimbra or Office 365. You can then make one of them your default mail account, so that it is used whenever you want to send an e-mail message from another program. Take advantage of the e-mail features included in various applications When you choose to send an e-mail by using a program's mail function, Affixa can create a draft of the message in your default webmail client or even send it automatically, provided certain preset parameters are met. After creating a draft, the application can show it in a web browser, display a confirmation message or simply close it and allow you to send it at a later date. Easily attach files to your e-mails Affixa enables you to create file baskets, containing documents that you wish to send via e-mail. Once you have loaded a list, you can have the application automatically create a draft containing all the attachments. If the files you want to send are too large to be handled by a particular webmail provider, the program can automatically upload them to a file hosting service. To conclude, if you are looking for a way to integrate your webmail account with the mail functions provided by certain applications, you should definitely try Affixa. It is a lightweight and intuitive tool that allows you to send e-mails directly from various programs, via your webmail account.
